The Star-Ledger/EAGLETON POLL

EMBARGOED — NOT FOR RELEASE UNTIL: WEDNESDAY, JUNE 18, 1997

The Star-Ledger/Eagleton Poll web address: http://www.rci.rutgers.edu/~eaglepol

A story based on the survey findings presented in this release and background memo will appear in Wednesday's Star-Ledger. We ask users to properly attribute this copyrighted information to "The Star-Ledger/Eagleton Poll."

In this release The Star-Ledger/Eagleton Poll includes a classification of voters that is based on how firmly they support a candidate. A "firm voter" is one who selects a candidate and says they are "very sure" about their choice and will not change their mind before the election. "Not firm voters" are those who select a candidate and say they might change their mind or who are initially undecided.

All of the percentages in this release, unless otherwise indicated, are based on New Jersey residents who report that they are registered to vote.

1997 GUBERNATORIAL RACE:
IDENTIFICATION OF ISSUES

Taxes and automobile insurance are two issues that New Jersey voters identify as being the most important in the 1997 Gubernatorial Election. In addition, about 8-in-10 voters report their opinions about taxes and automobile insurance will influence who they will select for Governor. While about 6-in-10 report their opinions about the tunnel in Atlantic City will influence their vote, half say that their opinions about the pension bond will guide their 1997 choice for Governor.

Overall, voters are evenly divided on who they think can do a better job handling the issue of automobile insurance with about a third selecting Whitman, a third McGreevey, and a third undecided about who they would select.

Voters opinions on two other issues are contradictory to what is currently happening with these issues. Seventy-two percent would like to vote on the pension bond even though the courts have

determined that the confirmation by the legislature is constitutional. And, 73 percent of the voters do not approve of building the tunnel in Atlantic City to connect one area of the city to another where a new casino has been proposed.

The latest Star-Ledger/Eagleton Poll of 633 registered voters conducted by telephone between June 11 and 15, 1997 also found that among those voters who select Christie Whitman as their choice for Governor, the main reason is because of her record in office. The main reasons why voters select McGreevey is because they feel it is time for a change, because he’s a Democrat, and because they dislike Whitman.

**MOST IMPORTANT STATE PROBLEM**

The two issues that New Jersey voters identify as the most important problem facing the state that the candidates for Governor will have to address are automobile insurance (27%) and taxes (21%). Education (14%) and unemployment (8%) are included among the voters’ top choices. Those who are not yet firm in their choice for Governor (30%) and firm Whitman supporters (26%) are somewhat more likely to name automobile insurance than firm McGreevey supporters (20%). However, firm McGreevey supporters (22%) and those who are undecided (21%) are somewhat more likely than firm Whitman supporters (17%) to name taxes.

**AUTO INSURANCE**

Three-in-four voters are not too (20%) or not at all (54%) satisfied with the cost and coverage of their automobile insurance compared to 21 percent who are very (4%) or somewhat (17%) satisfied. Firm McGreevey voters (78%) are more likely than those who are undecided about a candidate (75%) or firm Whitman voters (67%) to say they are not satisfied with the automobile insurance. At this time,
about half (49%) of the voters say that they have read or heard about the candidates' suggestions on how to reform auto insurance while half have not. In addition, voters are divided on who they think can do a better job at handling the issue with 32 percent selecting Whitman, 31 percent saying McGreevey, and 36 percent who don’t know which candidate they prefer to address automobile insurance issues. As would be expected, firm Whitman supporters (74%) select the Governor as being able to do a better job and firm McGreevey voters (78%) select their candidate. Among those who have not yet selected a candidate, Whitman (23%) and McGreevey (27%) are selected by about equal percentages of voters as best able to handle the automobile insurance issue while 50 percent don’t know which candidate will do a better job. Close to 8-in-10 voters (77%) say that their opinions about auto insurance will influence their choice for Governor a great deal (35%) or some (42%) compared to 23 percent who say it will not influence their vote much (13%) or not at all (10%). Firm McGreevey voters (86%) are more likely than those who are undecided about who to vote for (81%) or firm Whitman voters (61%) to say the automobile issue will influence their vote.

TAXES

By a margin of 56 to 43 percent, more voters say that they have not benefited (30% not much/26% not at all) from New Jersey’s 30 percent state income tax reduction than say they have benefited (7% a great deal/36% some). Firm Whitman supporters (67%) are more likely than those who have not decided on a candidate (41%) or firm McGreevey supporters (23%) to feel that they have benefited at least some from the 30 percent state income tax reduction. Also, about 6-in-10 voters say that their overall combined total that they pay in both state taxes and local property taxes has gone up compared to 31 percent who say they have stayed the same and 6 percent who say that they have gone
down. Firm McGreevey supporters (70%) are more likely than those who have not decided on a candidate (59%) or firm Whitman supporters (44%) to report the total they pay in state and local taxes have gone up. Among all voters, 80 percent say that the tax issue will influence their vote for Governor a great deal (39%) or some (41%). Firm McGreevey voters (90%) are more likely than those who have not decided on a candidate (80%) or firm Whitman supporters (70%) to say their opinions about the tax issue will influence their choice for Governor.

Voters are divided in their preferences between having the public schools funded by local property taxes (39%) or having an increase in the state income taxes (42%) to have the state provide all of the funding for the public schools. Firm Whitman supporters (50%) are more likely than those who have not yet decided on a candidate (38%) or those who are firm McGreevey voters (30%) to prefer having the local property taxes fund the public schools.

However, 61 percent of the voters say that even if there is a change made to have the state fund the public schools they expect that the combined total of their state taxes and local property taxes would go up compared to 9 percent who say they would go down and 23 percent who say that they would stay about the same.

THE PENSION BOND ISSUE

About 4-in-10 New Jersey voters have heard about the $2.76 billion dollar pension bond that was recently passed by the New Jersey Legislature. Voters who are firm for McGreevey (55%) and those who are firm for Whitman (51%) are more likely than voters who have not decided on a candidate (34%) to have heard about this bond issue. Overall, 25 percent of the voters approve of the legislature passing the bond issue compared to 30 percent who disapprove. However, 44 percent of the
voters did not have an opinion about the legislature’s action on the bond issue. Firm Whitman supporters (44%) are more likely to approve the passage of the bond issue than those who have not decided on a candidate (22%) or those who are firm McGreevey supporters (16%). Thirty-nine percent of the voters say that in their opinion the pension bond is a financial gimmick compared to 21 percent who describe it as good financial management. However, 40 percent do not have an opinion on the bond issue. Firm McGreevey voters (61%) are more likely to feel that it is a financial gimmick than firm Whitman voters (25%) or voters who are still undecided about their vote choice (36%).

Even though the passage of the bond issue by the legislature has been declared constitutional, 72 percent of the voters say they think the public should vote on it compared to 19 percent who say the legislature should be able to decide on this issue. Firm McGreevey voters (83%) and the voters who have not yet decided on a candidate (75%) are more likely than firm Whitman supporters (55%) to say the public should vote on the bond issue. Overall, 48 percent say that their opinions about the bond issue will have a great deal (15%) or some (33%) influence on who they will select as Governor compared to 46 percent who report it will not have much influence (23%) or none at all (23%). Firm McGreevey voters (61% — 32% a great deal/29% some) are more likely than those who are undecided (51% — 13% a great deal/38% some) or firm Whitman supporters (37% — 6% a great deal/31% some) to say that their opinions about the pension bond issue will have a great deal or some influence on their choice for Governor.

THE ATLANTIC CITY TUNNEL

Overall, 56 percent of the voters have read or heard a great deal (20%) or some (36%) about the tunnel in Atlantic City to connect one area of the city to another where a new casino has been proposed

- more -
compared to 43 percent who have not read or heard much (13%) or nothing at all (30%). As might be expected, voters in South Jersey (73%) are more likely than those in Central Jersey (59%) or North Jersey (44%) to have read or heard at least something about the tunnel. While 20 percent of the voters strongly (7%) or mildly (13%) approve of the tunnel, 73 percent strongly (57%) or mildly (16%) disapprove. Firm McGreevey voters (79%) are more likely than those who have not decided on a candidate (75%) or firm Whitman voters (66%) to disapprove of the tunnel. Also, voters in North Jersey (76%) and Central Jersey (74%) are more likely to disapprove of the tunnel than those in South Jersey (68%).

About 6-in-10 voters say that their opinions about the tunnel in Atlantic City will have a great deal (19%) or some (37%) influence on their choice for Governor this year compared to 4-in-10 who say it will have not much (20%) or not any (23%) influence. Firm McGreevey voters (64%) and those who have not yet decided on a candidate (60%) are more likely than firm Whitman supporters (43%) to say their opinions about the tunnel will influence their choice for Governor.

ECONOMIC CLIMATE FOR VOTERS

Overall, half (52%) of the voters say that their family’s financial situation has stayed the same over the past few years compared to 24 percent who say it is better and 22 percent who report it is worse. Firm Whitman supporters (51%) are more likely than firm McGreevey voters (11%) or those who are undecided (18%) to say their financial situation is better. Among firm McGreevey voters, 37 percent report their financial situation is worse while 22 percent of those who are undecided and 8 percent of firm Whitman voters say things are worse.
By a margin of 38 to 7 percent, voters who report their families financial situation is worse are about five times more likely than those who describe it as being better to say that most of the change is due to the Whitman administration.

**REASON FOR VOTE CHOICE**

Among the New Jersey voters who have selected a candidate they might vote for on Election Day, the three main reasons why Whitman supporters have selected her are: her record as Governor (41%), her positive personal qualities (12%), and taxes (9%). There are four reasons named by more than 10 percent of the voters who have selected Jim McGreevey: it’s time for a change (19%), because he is a Democrat (14%), dislike for Whitman (13%), and his positive personal qualities (10%).

Copyright, June 18, 1997, The Eagleton Institute and The Star-Ledger.
The latest Star-Ledger/Eagleton Poll was conducted between June 11 and June 16, 1997, when a random sample of 802 New Jerseyans, 18 years and older, was interviewed by telephone. Figures based on this sample size are subject to a sampling error of about ±3.5 percent at a 95 percent confidence interval. Sampling error is the probable difference in results between interviewing everyone in the population versus a scientific sample taken from that population. Sampling error does not take into account other possible sources of error inherent in any study of public opinion. The questions and figures referred to in this release are presented below. The location of each question on the actual questionnaire is in brackets. This data has been weighted using voter registration information from the New Jersey Secretary of State's office for party identification.

NOTE: FOR THIS RELEASE THE FINDINGS ON THE ELECTION ARE BASED ON 633 REGISTERED VOTERS AND HAVE A MARGIN OR ERROR OF ±4 PERCENT.

"[IF CANDIDATE NAMED IN Q.16 OR Q.17: What is the main reason why you are going to vote for (Candidate Named)?]" [Q.19]
