**New Jerseyans Give Sherrill Solid Ratings at 100 Days, but Uncertainty Remains**

*While the governor faces challenges ahead on cost of living and taxes, she gets high marks on education, public safety and transportation*

NEW BRUNSWICK, N.J. (Apr. 9, 2026) – Gov. Mikie Sherrill nears the end of her first 100 days in office with ratings on par with New Jersey governors of recent past and marks that indicate an electorate still forming its opinions of the new state leader, according to the latest Rutgers-Eagleton Poll.

Now that Sherrill has assumed office, 44% have a favorable impression of her, while 29% have an unfavorable one. Both positive and negative opinions have each ticked up a few points since January as more New Jerseyans take a side, but a quarter (24%) still have no opinion on the governor and 3% say they don't know who she is.

Sherrill has the highest favorability among the political figures included in this Poll.

Her first approval rating mirrors her favorability: 45% approve of the job the new governor is doing, 29% disapprove and 26% are unsure.

“Barely three months have passed since Gov. Sherrill has taken office, and while we see her continue to garner more positive reactions than negative ones, many of her constituents are still forming an opinion,” said [Ashley Koning](#), an assistant research professor and director of the [Eagleton Center for Public Interest Polling](#) at [Rutgers University-New Brunswick](#). “No governor can move the needle on the issues that matter most to New Jerseyans in just 100 days – especially against the backdrop of a hyperpartisan political climate and kitchen-table concerns like cost of living that have been building for years and will not yield overnight. But among those who have made up their minds, about 6 in 10 hold a favorable impression and approve of the job Sherrill is doing. These are solid baseline numbers, and the real test will come as New Jerseyans see more of what she can deliver.”

**Gov. Sherrill's First 100 Days  
Rutgers-Eagleton Poll**

The Poll asked residents to give Sherrill an overall grade for the job she is doing as governor on a standard educational grading scale ranging from A to F. Thirteen percent of residents give her an A, 30% a B, 19% a C, 11% a D and 14% an F. Fourteen percent are unsure.

The same scale was used to grade various policy areas. Sherrill receives average grades across the board – some areas higher than others – with around 1 in 5 residents on most issues unsure of what mark to give.

Sherrill's lowest grades are on the two most important issues that have been constantly at the top of New Jerseyans' minds: affordability and taxes. On both issues, about 3 in 10 New Jerseyans give the new governor an F. On cost of living, 5% give her an A, 13% a B, 21% a C, 16% a D and 30% an F. Fourteen percent are unsure of how to grade her. On taxes, 6% give Sherrill an A, 14% a B, 21% a C, 14% a D and 28% an F. Sixteen percent are unsure.

On the state's economy and jobs, 8% give her an A, 21% a B, 21% a C, 13% a D and 18% an F. Twenty percent are unsure. On the state budget and government spending, 9% give her an A, 20% a B, 16% a C, 12% a D and 21% an F. Twenty-three percent are unsure.

"Gov. Sherrill's grades mirror much of what we saw as Gov. Phil Murphy left office, pointing to how difficult it is for any new governor – especially one of the same party – to make headway on substantive issues while still building out her administration and setting an agenda," Koning said. "None of these issues have easy answers, and the grades reflect that reality and the surmounting challenges that have grown over time more than any judgment of her early governorship thus far."

Sherrill gets her highest marks on crime and public safety, as well as transportation and infrastructure and education.

On crime and safety, 11% of residents give Sherrill an A, 24% a B, 19% a C, 8% a D and 18% an F, while 21% are unsure.

Twelve percent give her an A on transportation and infrastructure, 21% a B, 20% a C, 12% a D and 14% an F, with 21% unsure of how to grade her. On education and schools, 10% give Sherrill an A, 23% a B, 19% a C, 10% a D and 15% an F, with 23% uncertain.

Sherrill also garners good marks on healthcare, with 8% of residents giving her an A, 19% a B, 20% a C, 12% a D and 15% an F, with 26% unsure how to grade her.

Regarding other New Jersey politicians, residents are split on U.S. Sen. Cory Booker. Thirty-eight percent of residents have a favorable view, while 33% have an unfavorable view and 20% have no opinion. Eight percent say they don't know who he is.

**Gov. Sherrill's First 100 Days  
Rutgers-Eagleton Poll**

New Jerseyans are twice as likely to have a positive than negative view of U.S. Sen. Andy Kim (34% favorable versus 17% unfavorable), though half either have no opinion on the junior senator (30%) or don't know who he is (20%).

As for President Donald Trump, 26% say they have a favorable impression of him, 61% are unfavorable and 12% have no opinion.

Results are from a statewide poll of 1,568 adults contacted through the probability-based [Rutgers-Eagleton/SSRS Garden State Panel](#) from March 27 to March 30. The full sample has a margin of error of +/- 3.2 percentage points.

###

**ABOUT THE EAGLETON CENTER FOR PUBLIC INTEREST POLLING**

*Home of the Rutgers-Eagleton Poll, the Eagleton Center for Public Interest Polling (ECPIP) was established in 1971 and is the oldest and one of the most respected university-based statewide polling operations in the United States. Now in its 56th year and with the publication of over 200 polls, ECPIP's mission is to provide scientifically sound, nonpartisan information about public opinion. In addition to its public polling, ECPIP partners with organizations, foundations, and public agencies to design and conduct custom survey research on issues of public concern. To learn more about ECPIP, explore our published research and data archive, or inquire about our research services, please visit our website: [eagletonpoll.rutgers.edu](http://eagletonpoll.rutgers.edu). You can also visit our [Facebook](#), [Bluesky](#), and [LinkedIn](#).*

**ABOUT THE RUTGERS-EAGLETON/SSRS GARDEN STATE PANEL**

*The [Rutgers-Eagleton/SSRS Garden State Panel](#) is a probability-based panel of New Jersey adults age 18 or older. The panel is managed and maintained by [SSRS](#), a full-service research firm based in Glen Mills, PA. Panelists are recruited randomly based on statewide representative ABS (Address Based Sample) design. The ABS sample is drawn from the Delivery Sequence File (DSF) maintained by the U.S. Postal Service, which provide population coverage in the 98%-99% range. The Rutgers-Eagleton/SSRS Garden State Panel is a multi-mode panel. Internet households participate via web while all non-internet households (including those who have internet but are unwilling to take surveys online) participate via phone. Panelists also have the option of taking surveys in their preferred language (English or Spanish).*

**ABOUT THE EAGLETON INSTITUTE OF POLITICS**

*The Eagleton Center for Public Interest Polling is a unit of the Eagleton Institute of Politics at Rutgers University–New Brunswick. The Eagleton Institute studies how American politics and government work and change, analyzes how the democracy might improve and promotes political participation and civic engagement. The Institute explores state and national politics through research, education and public service, linking the study of politics with its day-to-day practice. To learn more about Eagleton programs and expertise, visit [eagleton.rutgers.edu](http://eagleton.rutgers.edu).*

**ABOUT RUTGERS UNIVERSITY-NEW BRUNSWICK**

**Gov. Sherrill's First 100 Days  
Rutgers-Eagleton Poll**

*Rutgers University-New Brunswick is where Rutgers, The State University of New Jersey, began more than 250 years ago. Ranked among the world's top 60 universities, Rutgers's flagship university is a leading public research institution and a member of the prestigious Association of American Universities. It is home to internationally acclaimed faculty and has 12 degree-granting schools and a Division I Athletics program. It is the Big Ten Conference's most diverse university. Through its community of teachers, scholars, artists, scientists and healers, Rutgers is equipped as never before to transform lives.*

**QUESTIONS AND TABLES START ON THE FOLLOWING PAGE**

**Questions and Tables**

*The questions covered in this release are listed below. Column percentages may not add to 100% due to rounding. Respondents are New Jersey adults 18+ unless otherwise noted; all percentages are of weighted results. Interpret groups with samples sizes under 100 with extreme caution.*

**Methodology**

This Rutgers-Eagleton Poll was conducted using the [Rutgers-Eagleton/SSRS Garden State Panel](#) Omnibus platform. The Garden State Panel Omnibus is a quarterly, New Jersey statewide, probability-based survey. Data collection was conducted from March 27 to 30, 2026, with a scientifically selected random sample of 1,568 New Jersey adults, 18 or older. The survey was conducted via web and administered in English and Spanish.

The Garden State Panel Omnibus is conducted on the Rutgers-Eagleton/SSRS Garden State Panel. The Rutgers-Eagleton/SSRS Garden State Panel is a joint research venture between the Eagleton Center for Public Interest Polling (ECPIP) at Rutgers University-New Brunswick and SSRS. It is a probability-based panel of New Jersey adults ages 18 or older. Members are recruited randomly based on statewide representative ABS (Address Based Sample) design. ABS sample is drawn from the Delivery Sequence File (DSF) maintained by the U.S. Postal Service. Population coverage of the DSF is in the 98%-99% range. During the recruitment process, full demographic information on panelists is collected.

The Rutgers/SSRS Garden State Panel is a multi-mode panel. For this poll, only Internet households were invited to participate via web; non-internet households were not included. Sample was drawn using a probability proportional to size (PPS) methodology to ensure adequate representation of each demographic group while minimizing the variability of the final weights. The sample was additionally stratified by preferred survey language to meet the sample size targets for each group.

Data were weighted to represent the residential adult population of New Jersey. The data were weighted by first applying a base weight then balancing the demographic profile of the sample to target population parameters.

With the base weight applied, the data were weighted to balance the demographic profile of the sample to the target population parameters.

Data were weighted to distributions of age, race/ethnicity by nativity, gender/sex by age, gender/sex by education, age by education, NJ region, home tenure, number of household adults, civic engagement, frequency of Internet use, and 2024 presidential recalled vote.

The following table shows the data sources used for calibration totals.

**Table 1. Calibration Variable Sources**

Calibration Variables	Sources
<ul style="list-style-type: none"> <li>• Gender</li> <li>• Age</li> <li>• Education</li> <li>• Race</li> <li>• Ethnicity</li> <li>• Hispanic nativity</li> <li>• Number of adults in household</li> <li>• Home tenure</li> </ul>	2025 Current Population Survey <sup>1</sup>
<ul style="list-style-type: none"> <li>• NJ Region</li> </ul>	ACS 2024 1-Year Estimates <sup>2</sup>
<ul style="list-style-type: none"> <li>• Internet frequency</li> </ul>	SSRS Opinion Panel
<ul style="list-style-type: none"> <li>• Civic engagement</li> </ul>	September 2023 CPS Volunteering and Civic Life Supplement <sup>3</sup>
<ul style="list-style-type: none"> <li>• 2024 Presidential recalled vote<sup>4</sup></li> </ul>	National Election Pool

Final calibrated weights are trimmed at the 5<sup>th</sup> and 95<sup>th</sup> percentiles to prevent individual interviews from having too much influence on survey-derived estimates.

Post-data collection statistical adjustments require analysis procedures that reflect departures from simple random sampling. We calculate the effects of these design features so that an appropriate adjustment can be incorporated into tests of statistical significance when using these data. The so-called "design effect" or *deff* represents the loss in statistical efficiency that results from a disproportionate sample design and systematic non-response. The total sample design effect for this survey is 1.70.

All surveys are subject to sampling error, which is the expected probable difference between interviewing everyone in a population versus a scientific sampling drawn from that population. Sampling error should be adjusted to recognize the effect of weighting the data to better match the population. In this poll, the simple sampling error for 1,568 New Jersey adults is +/-2.5 percentage points at a 95% confidence interval. The design effect is 1.70, making the adjusted margin of error +/- 3.2 percentage points. Thus, if 50% of New Jersey adults in this sample favor a particular position, we would be 95% sure that the true figure is between 46.8 and 53.2% (50 +/- 3.2) if all New Jersey adults had been interviewed, rather than just a sample.

<sup>4</sup> Recalled vote in the 2024 presidential election is defined as the chosen candidate of panelists who are currently registered to vote, specifically among the following listed candidates: Kamala Harris, Donald Trump, Jill Stein, Chase Oliver, and Robert F. Kennedy, Jr. Panelists who are not currently registered to vote or voted for a non-listed candidate are counted along with those who did not vote in the election.

**Gov. Sherrill's First 100 Days  
Rutgers-Eagleton Poll**

Sampling error is only one possible source of error in a survey estimate. Sampling error does not consider other sources of variation inherent in public opinion studies, such as selection bias, non-response bias, question wording, context effects, or reporting accuracy, which may contribute additional error.

This Rutgers-Eagleton Poll was fielded by SSRS through the Rutgers-Eagleton/SSRS Garden State Panel. The questionnaire was developed and all data analyses were completed in house by the Eagleton Center for Public Interest Polling (ECPIP). Ashley Koning and Jessica Roman led analysis and preparation of this release, with assistance from David Martin. The Rutgers-Eagleton Poll is paid for and sponsored by the Eagleton Institute of Politics at Rutgers, The State University of New Jersey, a non-partisan academic center for the study of politics and the political process. Full questionnaires are available on request and can also be accessed through our archives at [eagletonpoll.rutgers.edu](http://eagletonpoll.rutgers.edu).
